# PREFACE

This volume of RIMS Kôkyûroku Bessatsu is the proceedings of the RIMS Conference

## **“Expansion of Integrable Systems”**

held at Research Institute for Mathematical Sciences (RIMS), Kyoto University from August 11 through August 13, 2008.

In the conference, 14 invited speakers talked about their recent research on integrable systems and related topics. We hope it was a good opportunity for 74 participants to overview recent trends in integrable systems and get a hint for future research.

This volume collects 12 contributions from the speakers of the conference. All the papers are refereed. We thank the authors and anonymous referees for their great effort. Without their help this volume would not have been published.

This conference was supported by RIMS. We are very grateful to RIMS and in particular, to secretary staff, whose support made the conference successful and the editorial work smooth.

September, 2009

Atsushi NOBE

# CONTENTS

1. Akiko FUKUDA, Emiko ISHIWATA, Masashi IWASAKI and Yoshimasa NAKAMURA	1
Discrete hungry integrable systems related to matrix eigenvalue and their local analysis by center manifold theory	
2. Hiroyuki TORIKAI	19
A discrete-state spiking neuron model and its learning potential	
3. Yasuaki HIRAOKA	35
Remarks on collision manifolds and nonexistence of non self-similar collision solutions in the 3-vortex problem	
4. Yousuke OHYAMA	45
Analytic solutions to the sixth $q$ -Painlevé equation around the origin	
5. Kenji KAJIWARA and Yasuhiro OHTA	53
Bilinearization and Casorati determinant solutions to non-autonomous $1+1$ dimensional discrete soliton equations	
6. Hironori TANAKA, Junta MATSUKIDAIRA, Atsushi NOBE and Teruhisa TSUDA	75
Constructing two-dimensional integrable mappings that possess invariants of high degree	
7. Shin ISOJIMA, Tomoyuki KONNO and Junkichi SATSUMA	85
On oscillatory solutions in ultradiscrete system	
8. Ryogo HIROTA	95
Ultradiscrete analogue of the identity of Pfaffians	
9. Hiroyuki YAMAGISHI, Yoshinori KAMETAKA, Atsushi NAGAI, Kohtaro WATANABE and Kazuo TAKEMURA	125
Riemann zeta function and the best constants of five series of Sobolev inequalities	
10. Mitsuru SHIBAYAMA	141
Existence and stability of periodic solutions in the isosceles three-body problem	
11. Shinsuke IWAO	157
The periodic box-ball system and tropical curves	
12. Rei INOUE and Tomoyuki TAKENAWA	175
Tropical Jacobian and the generic fiber of the ultra-discrete periodic Toda lattice are isomorphic
